

CHARGE 33

FEATURES

The CHARGE family is an architectural power house for general, high output lighting applications. With options for up lighting across some of the range, CHARGE is available in depths of 24, 33, 73, and 105mm.

CHARGE 33 is an architecturally designed profile, purpose built for large scale use and it can be suspended or surface mounted.

- W50mm x H33mm
- Satin opal polycarbonate diffuser
- Anodised aluminium, black or white powder-coat finishes
- Custom colour finishes available
- Suspend or surface mount

ACCESSORIES

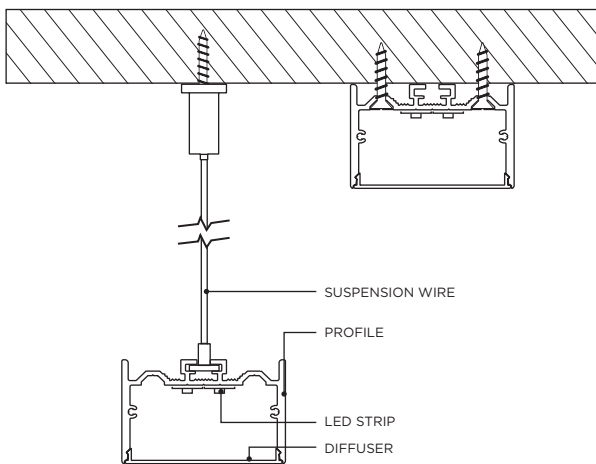

Complete profile systems include all accessories required for the specific application and installation. An accessories data sheet is available.
